

SPECOLA VATICANA

ROMA 6. VII. '15

Dear Sir,

Please, accept my sincerest thanks for the 3 extra-copies of your interesting Catalogue of "Nebulae seen on the F. A. plates". This Catalogue is a first real "Durchmusterung" of Nebulae, and opens a vast problem for both visual and photographic work. It will help me greatly in my line of work, of which you may see something later. Respectfully and gratefully  
Hagen.
